Adam

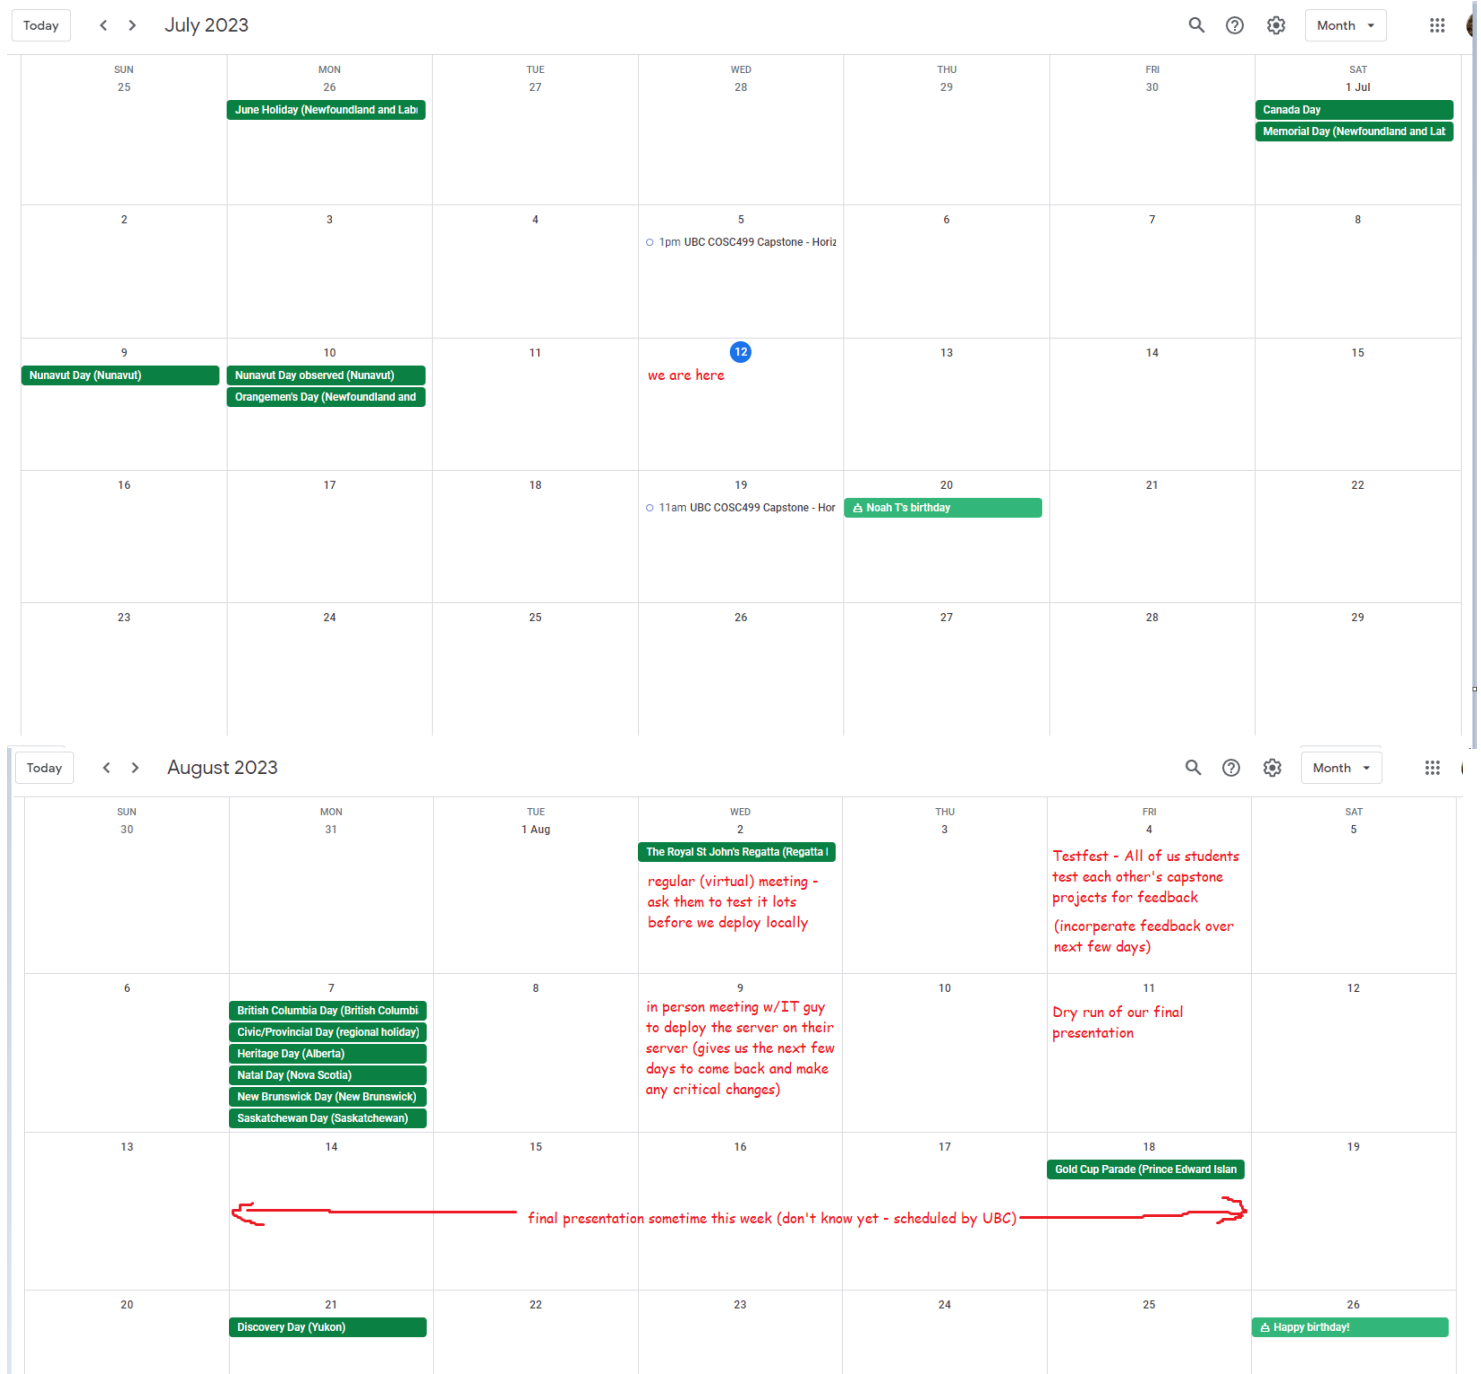

- Thurs July 13th
- overall time spent: 4h
- Reviewed PR #136 more (still had some bugs, poor jordan), PR #186 (small), and PR #187 (large)
 - Discussed some styling changes for the main buttons (where to put them, emphasis on more important ones)
 - Updated Personal logs
 - Created Report

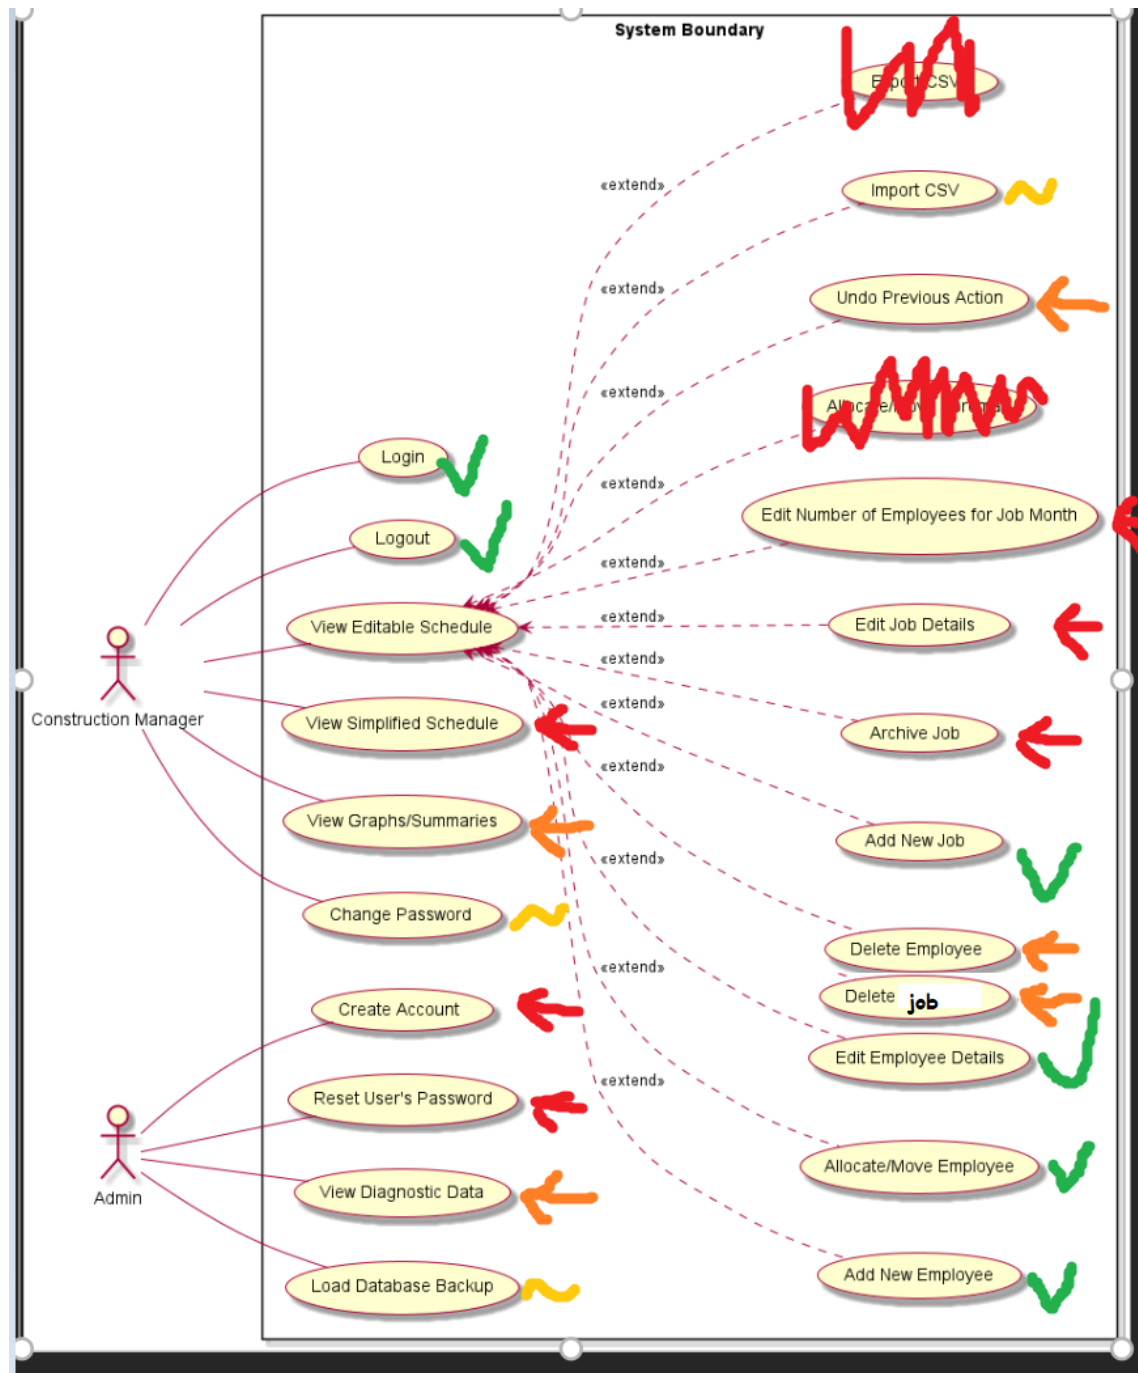

Wed July 12th

overall time spent: 4.5h

- Meeting with Scott
- Discussed a lot about deployment -specifically when we're going to deploy (Aug 9th) as well as what we need to send the Horizon's IT guy (we're gonna do a call) -2h
- Discussed undo again, gave off a bunch of cases that need undo and some cases that would be nice to have. Also mentioned that since undo requires such a massive architecture change (integrate a command pattern) with a lot of needed tests, it's probably not gonna happen
- Discussed what use cases we have done, what we absolutely need done, and what we should have done but less priority
- Made some minor fixes to the visual job dates
- Reviewed PR #160, #159 -0.5h/each (medium-sized)

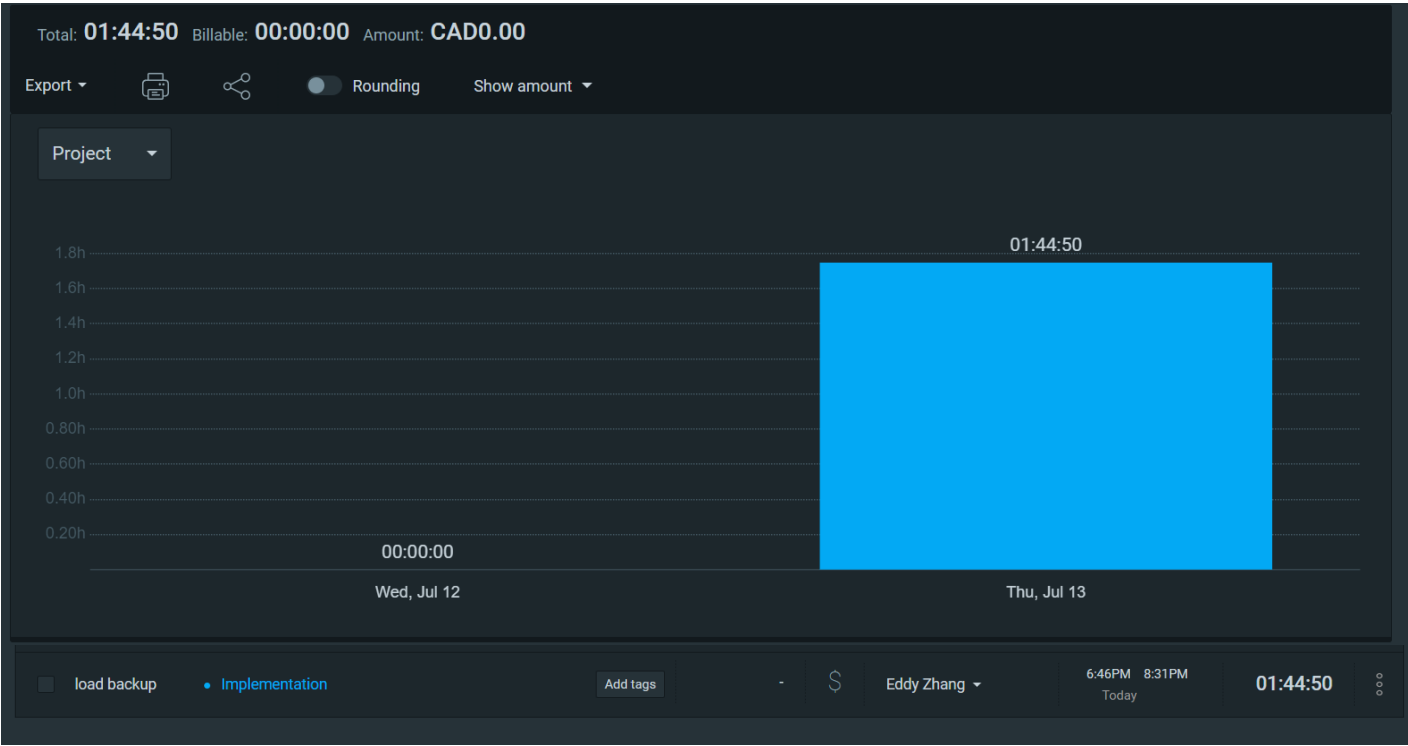

(diagram for showing when our final client meetings are (including finally deploying), as well as how long we have left)

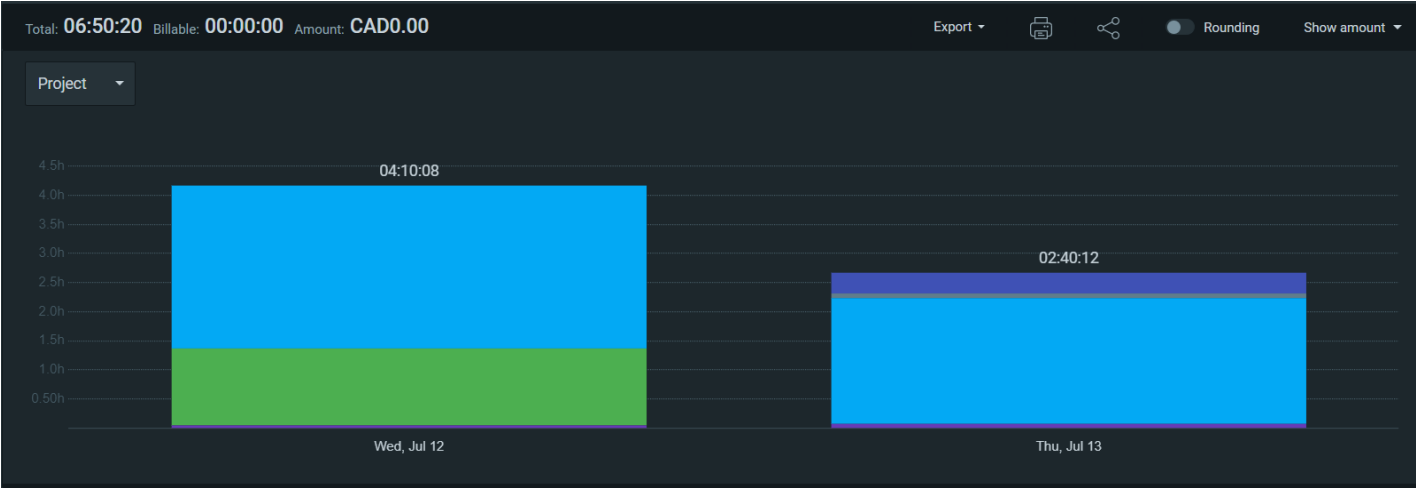

(use cases we have done, have partially done, need done, need done but less priority)
