130	• Custom Order - Frontend logic #232	 Zecr	▼	In Progress
131	• Custom Order - Database request optimization #233	 Zecr	▼	In Progress
132	• Custom Order - Styling UI and drag drop #234	 Zecr	▼	In Progress

Burnup

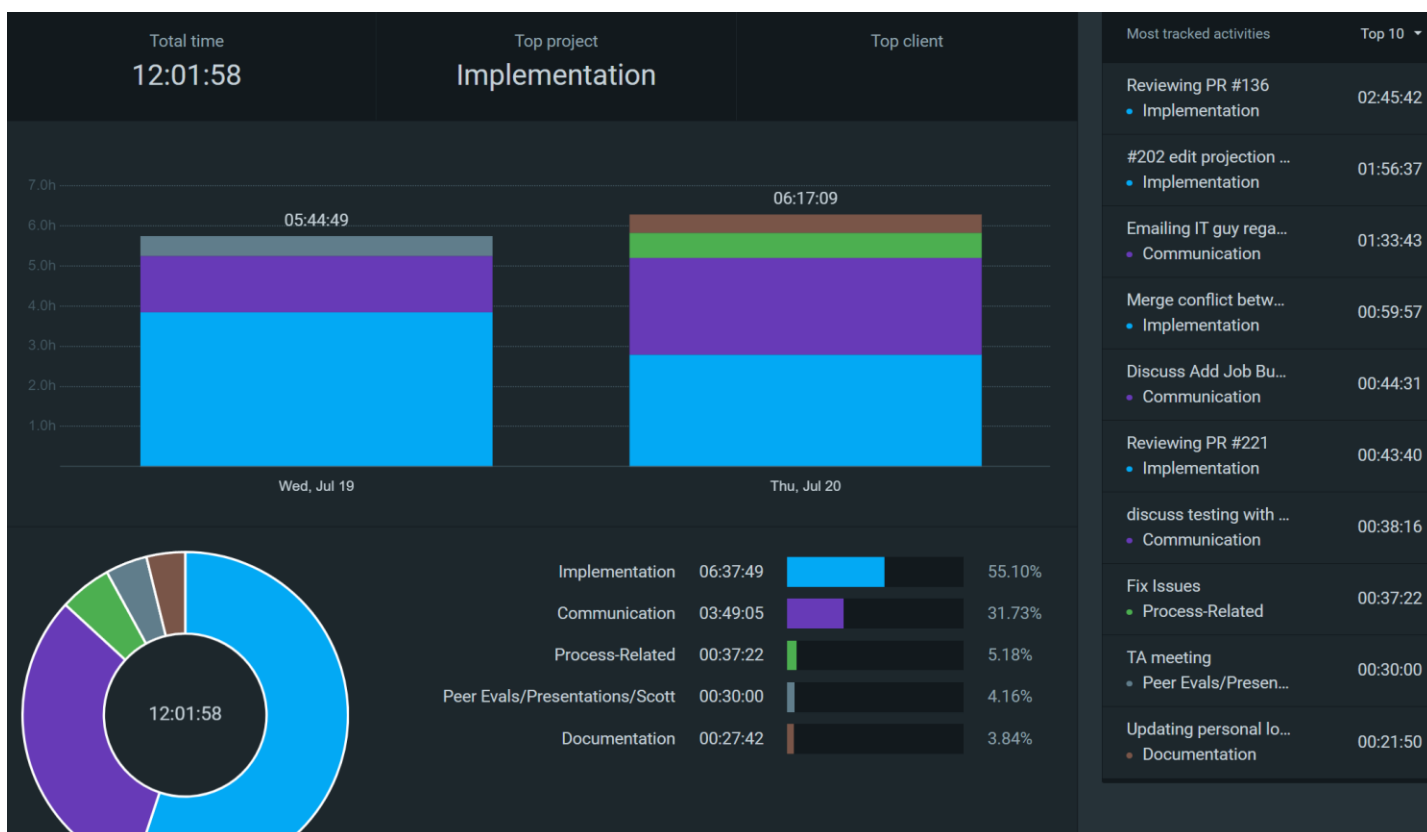

New GitHub update broke the burnup charts, it says there's 82 done when we have 100+ done. Expect to be fixed soon

### Time Summary

Team activities						
TEAM MEMBER	LATEST ACTIVITY		TOTAL TRACKED (JUL 19 - JUL 20)

ED Edwin	Review stuff, communication, and ge...	02:31:13	3 hours ago	13:10:52		

Adam

Overall let's say 6 cards done

Thurs July 20th

overall time spent: 6.5h

- Wrote email to IT guy regarding security issues with putting it on putting on a computer as opposed to their server. He agrees with me though now he wants to put it on a virtual machine using Hyper-V, and that seems unnecessary seeing as how we're already using docker
- Fixed, reorganised, and added new issues

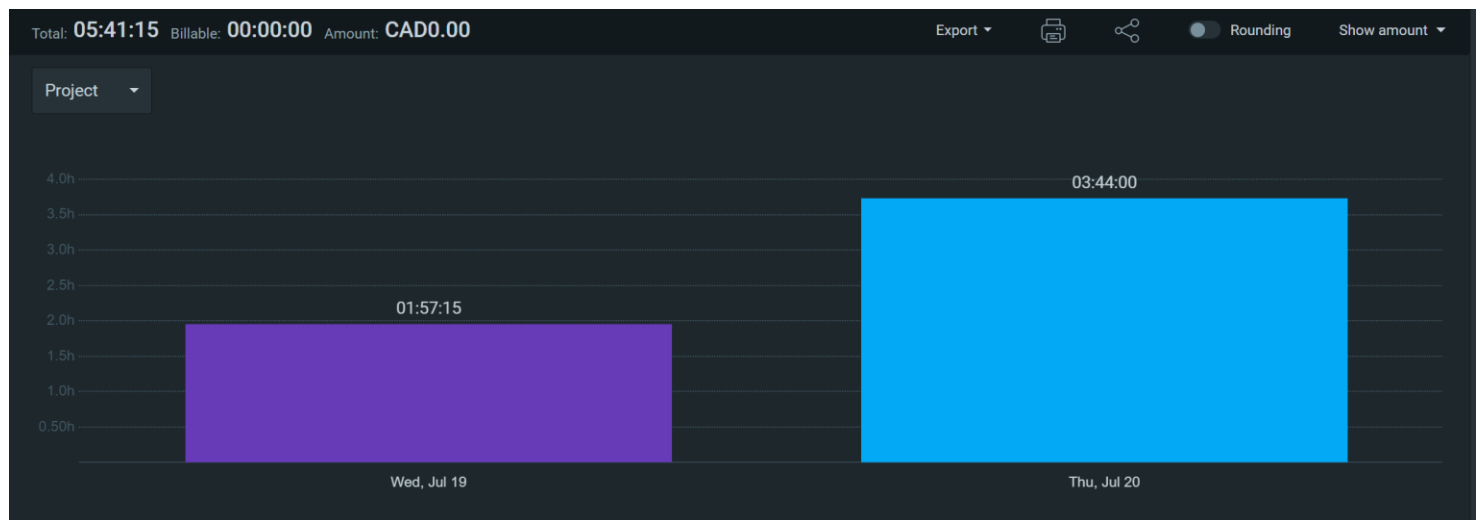

- Reviewed PR #136 yet again, cleaned it up (removed images and backups, refactored it to use security functions, added a bunch of comments, and fixed a few bugs (including indicating that the server is processing an image))
- Starting reviewing PR # 214
- Updated personal logs
- Made Report

## Wed July 19th

overall time spent: 5.5h

- TA meeting
- Showed Jordan and Edwin the new styling in edit projection number and implemented a few suggestions
- Discussed Edit job and how to do the asynch updates with jordan
- Finished all the tests for edit projection number and got it merged!
- Reviewed Add job (PR #136 some more) and pointed out some more things for compressing images to below 10KB
- Collaborated with Edwin to fix the big merge conflict between edit projection number and admin view (took 1 hour, it was a very manual process)
- Discussed testing with edwin to see if there's a way to do phpunit without needing to refactor all SESSION, POST, and die() references within the function we want to test (he looked a lot into getting curl working, but unfortunately no luck)
- Reviewed PR #221 (recent assignments)

## Eddy

TIME ENTRY		AMOUNT	USER	TIME	DURATION
importcsv	Implementation	-	Eddy Zhang	7:35PM 10:24PM 07/20/2023	02:48:33
move employee test	Communication	-	Eddy Zhang	1:00PM 2:57PM 07/19/2023	01:57:15
importcsv admin page	Implementation	-	Eddy Zhang	10:46PM 11:34PM 07/20/2023	00:47:49
importcsv admin page	Implementation	-	Eddy Zhang	11:44PM 11:51PM 07/20/2023	00:07:38

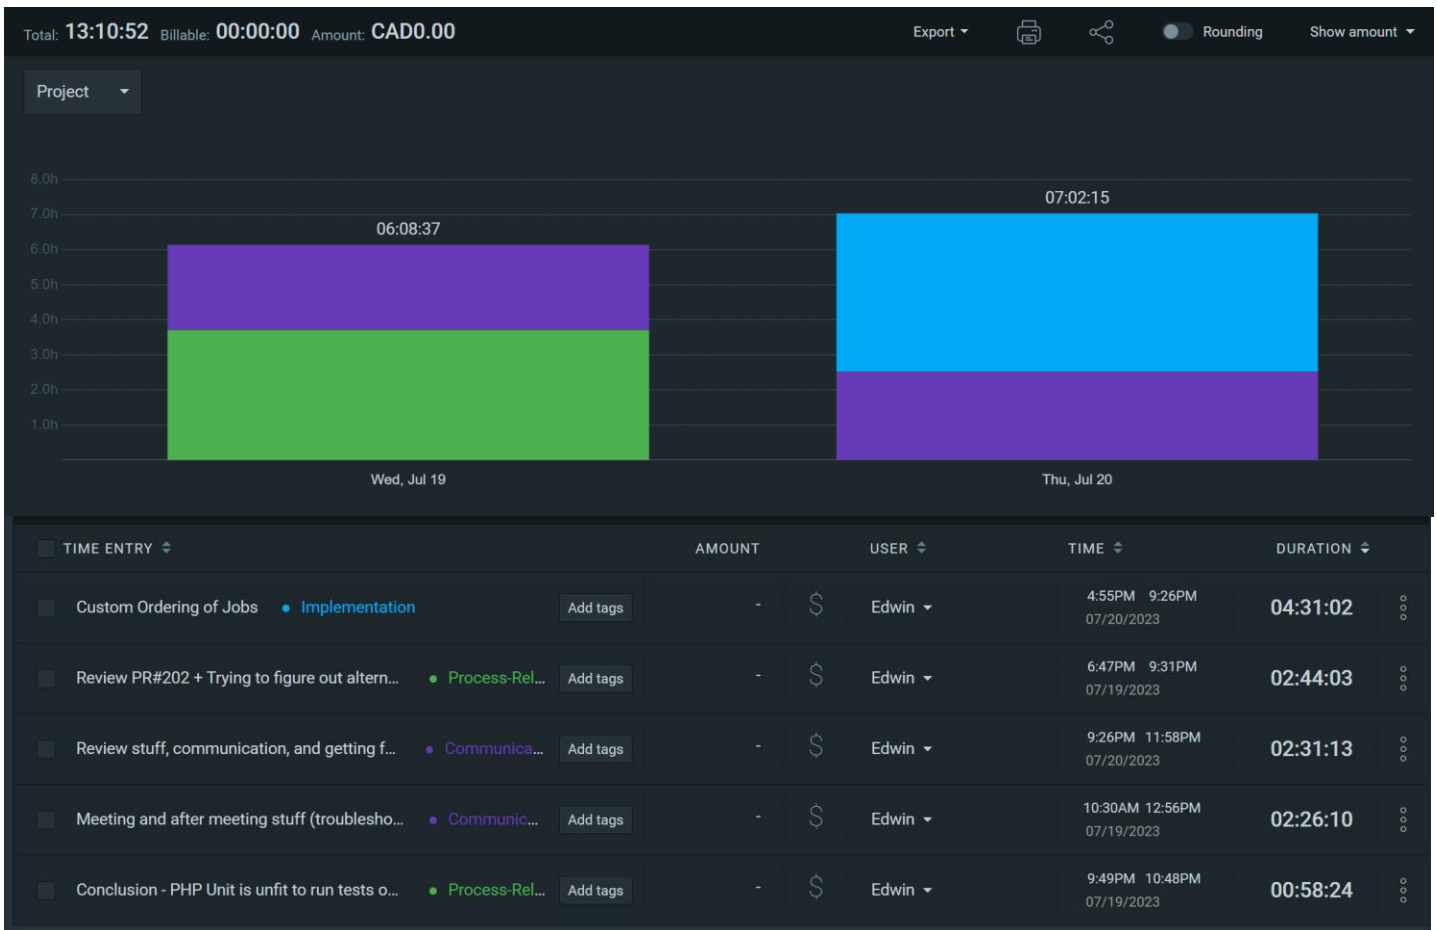

Wed, Jul 19 - 2 hr

- Team meeting
- Team discussion after meeting
- debug move employee test

Thu, Jul 20 - 3.5 hr

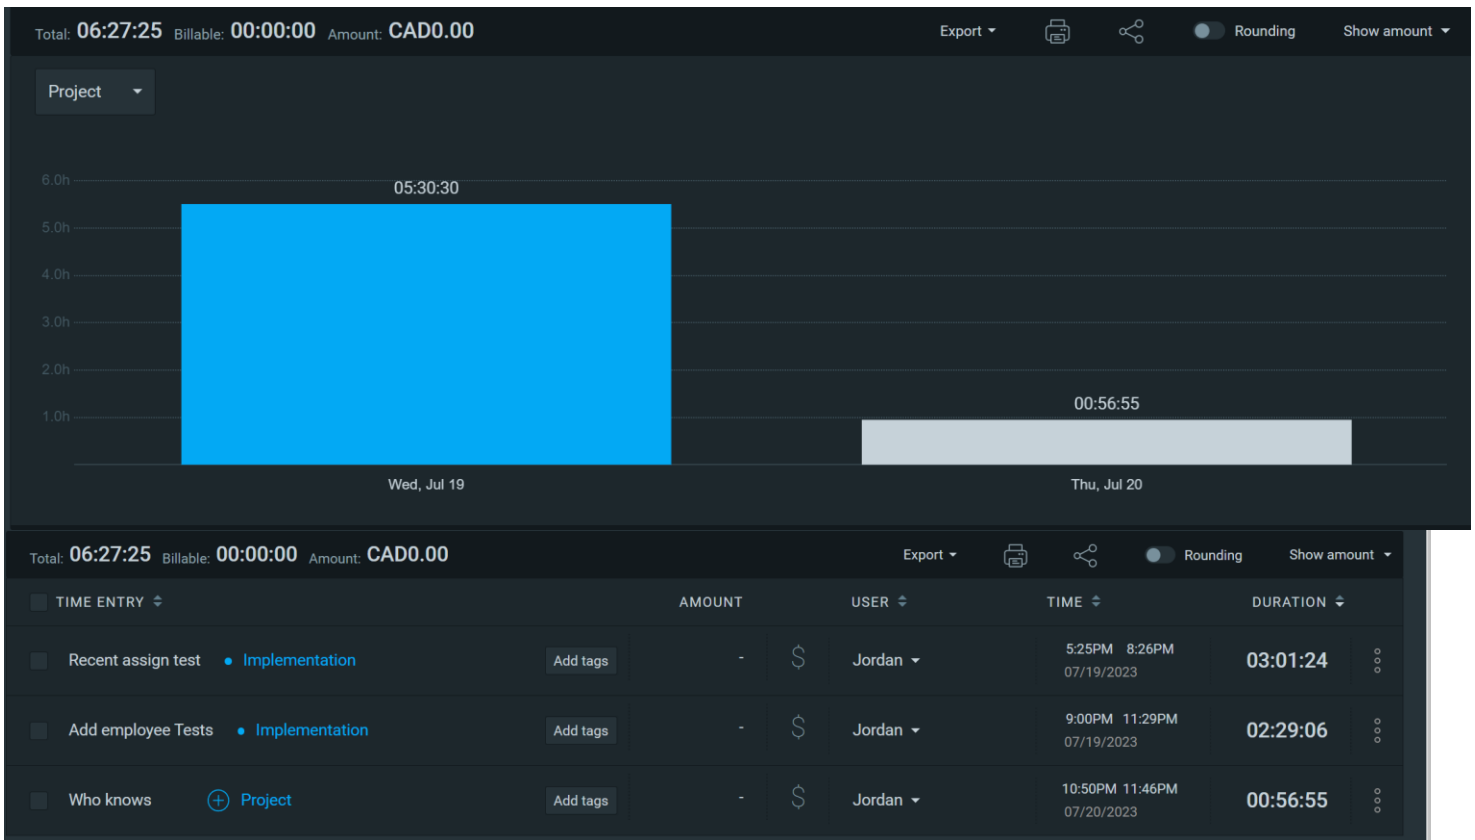

- added navbar for process csv upload
- import jobs complete
- admin page integration

## Edwin

Meeting and after meeting stuff (troubleshoot PHP unit)	2023-07-19	146	2.433333333
Review PR#202 + Trying to figure out alternate way to write tests	2023-07-19	164	2.733333333
Conclusion - PHP Unit is unfit to run tests on PHP files that contain session_start()	2023-07-19	58	0.966666667
Custom Ordering of Jobs	2023-07-20	271	4.516666667
Review stuff, communication, and getting feedback	2023-07-20	139	2.316666667

## Jordan
