

Horizon Scheduling Board

Report Fri Aug 4th (reflect work Aug 2 – 3)

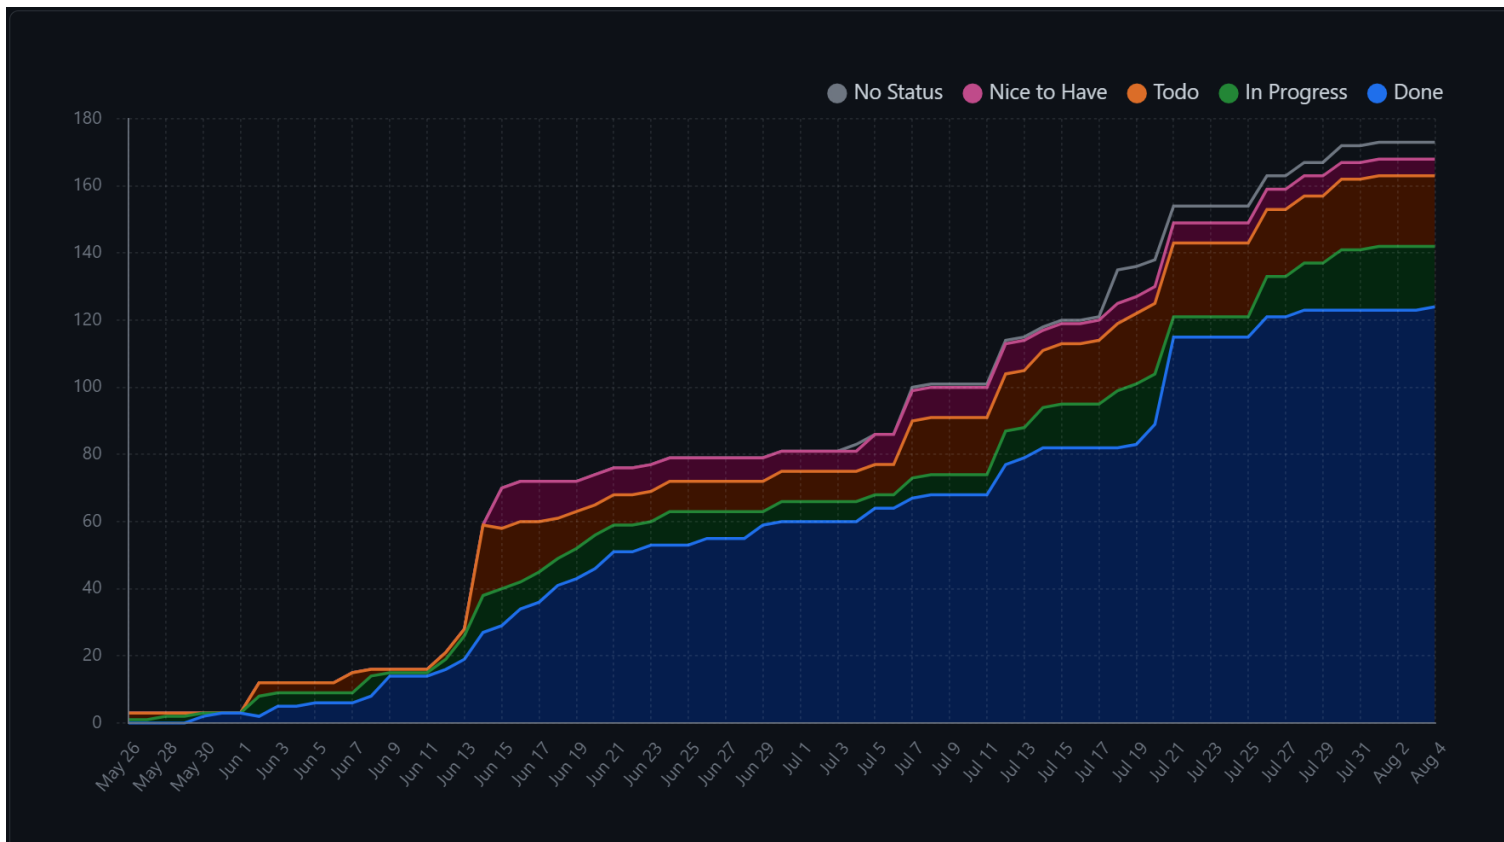

Completed Tasks

156	✔ Upload Backup #287	 trtin1	Done
157	✔ Edit Job Details frontend styling #289	 JordoRob	Done
158	✔ Edit job details client-side validation #290	 AdamFipke	Done
159	✔ Projections Styling #291	 Zecr	Done
160	✔ Push custom order to projector #294	 Zecr	Done
161	✔ Change projector account password #295	 Zecr	Done
162	✔ Styling - Fix un-archive styling #277	 Zecr	Done
163	✔ Styling - Match trash and archive icons and overlay #278	 Zecr	Done
164	✔ Styling - Move archive and delete icons to be hidden behind edit b... #279	 Zecr	Done
165	✔ Styling - Clean up unneeded styles #280	 Zecr	Done
166	✔ Styling - Consolidate repeated styles into one file #281	 Zecr	Done
167	🟢 Refactor DB + Backend to make manager a VARCHAR #134	 JordoRob	Done
154	✔ Finish import CSV #285	 AdamFipke and  trtin1	Done
155	✔ Download backup #286	 trtin1	Done
128	✔ Job Details Overlay Window - Graphs and Summaries #61	 AdamFipke and  Jor...	Done

In Progress

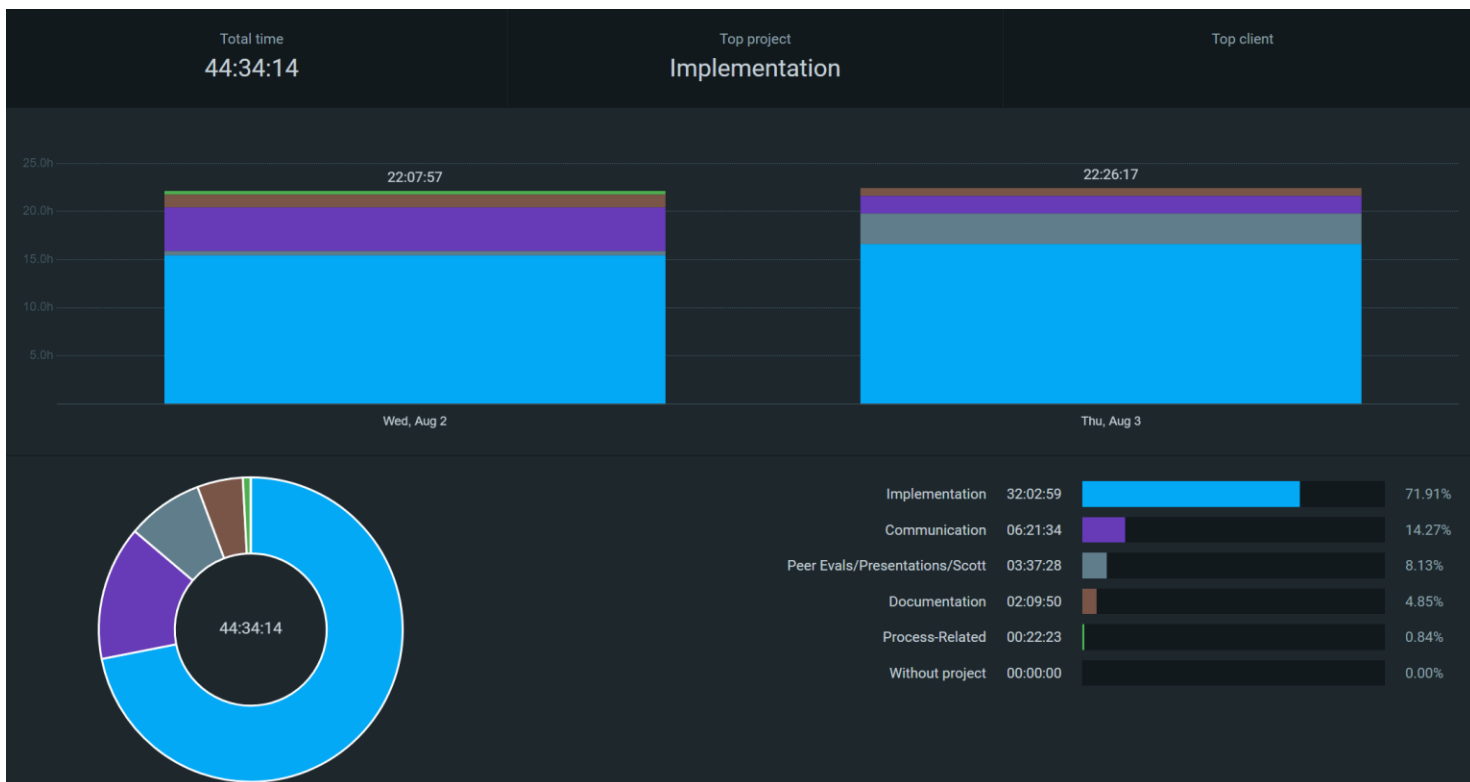

168	🟢 History Screen - Crazy Query #261	 AdamFipke	In Progress
169	🟢 History Screen #220	 AdamFipke and  Jor...	In Progress
170	🟢 Change static dropdown options to dynamically pull from Global D... #148	 Zecr	In Progress
171	🟢 fix mass_remove.php to end assignment date (see desc) #269	 Zecr	In Progress
172	🟢 Help screen #296	 yuan-yz-z	In Progress

Burnup

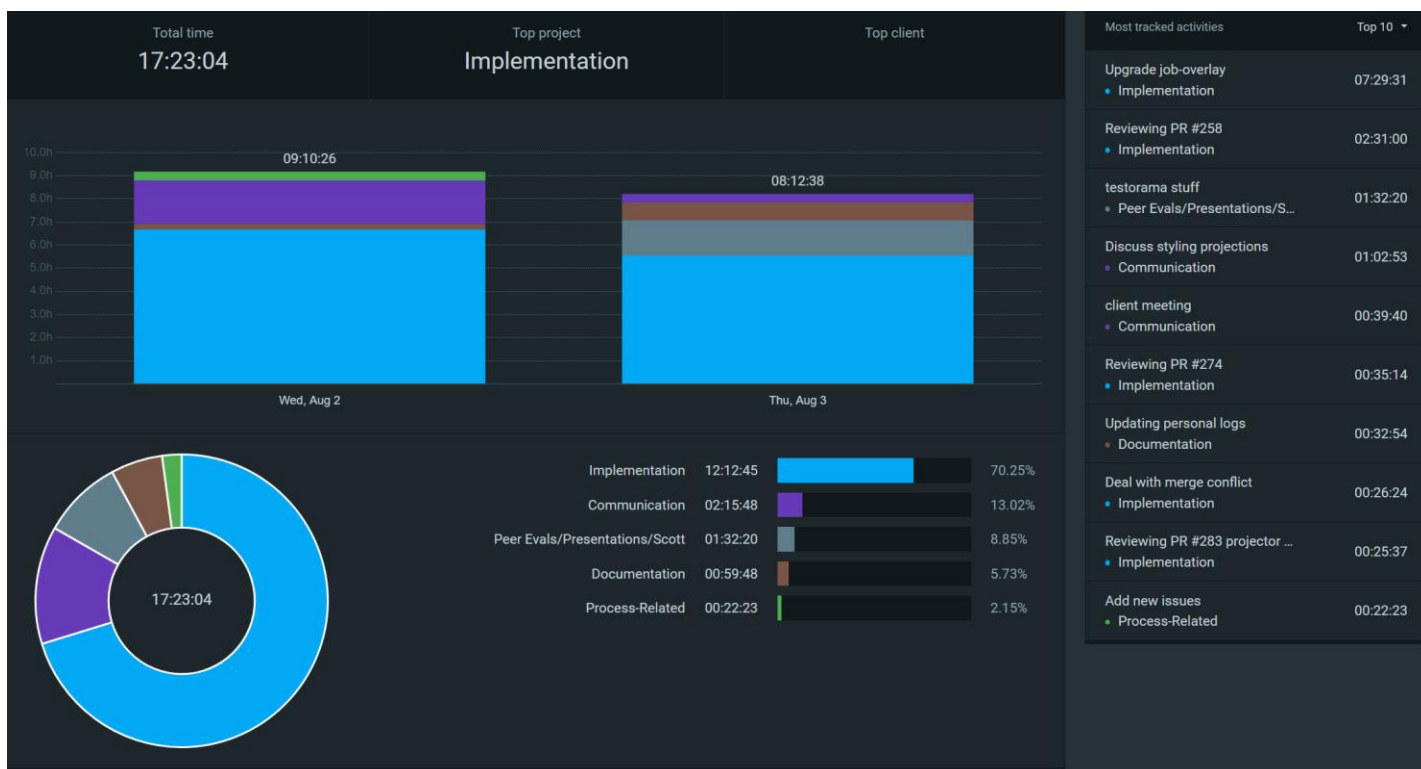

I think github projects might be broken again

Time Summary

TEAM MEMBER ▾	LATEST ACTIVITY ▾		TOTAL TRACKED (AUG 2 - AUG 3) ▾		
 Edwin	(no description) (Without project)	00:03:22  In progress	12:07:53		
 Adam	Create report • Documentation	00:10:23  In progress	17:23:04		
 Yuan	documentation tab page • Implementation	00:07:35 2 hours ago	05:32:29		
 Jordan	Crying • Implementation	00:50:11 2 hours ago	06:35:28		
 Eddy Zhang	import csv global table • Implementation	00:31:11 2 hours ago	02:55:20		

Adam

Overall let's say 10 cards done

Thurs Aug 3rd

overall time spent: 8h

- Did a bunch of testorama stuff
 - Took edwin's list of tasks to do and re-organised it and designed it so they would reset the database after each test (added/removed a bunch of steps too)
 - Made a testorama document to be printed off during for the event (yuan said she will print them off)
 - Discussed the plan for it

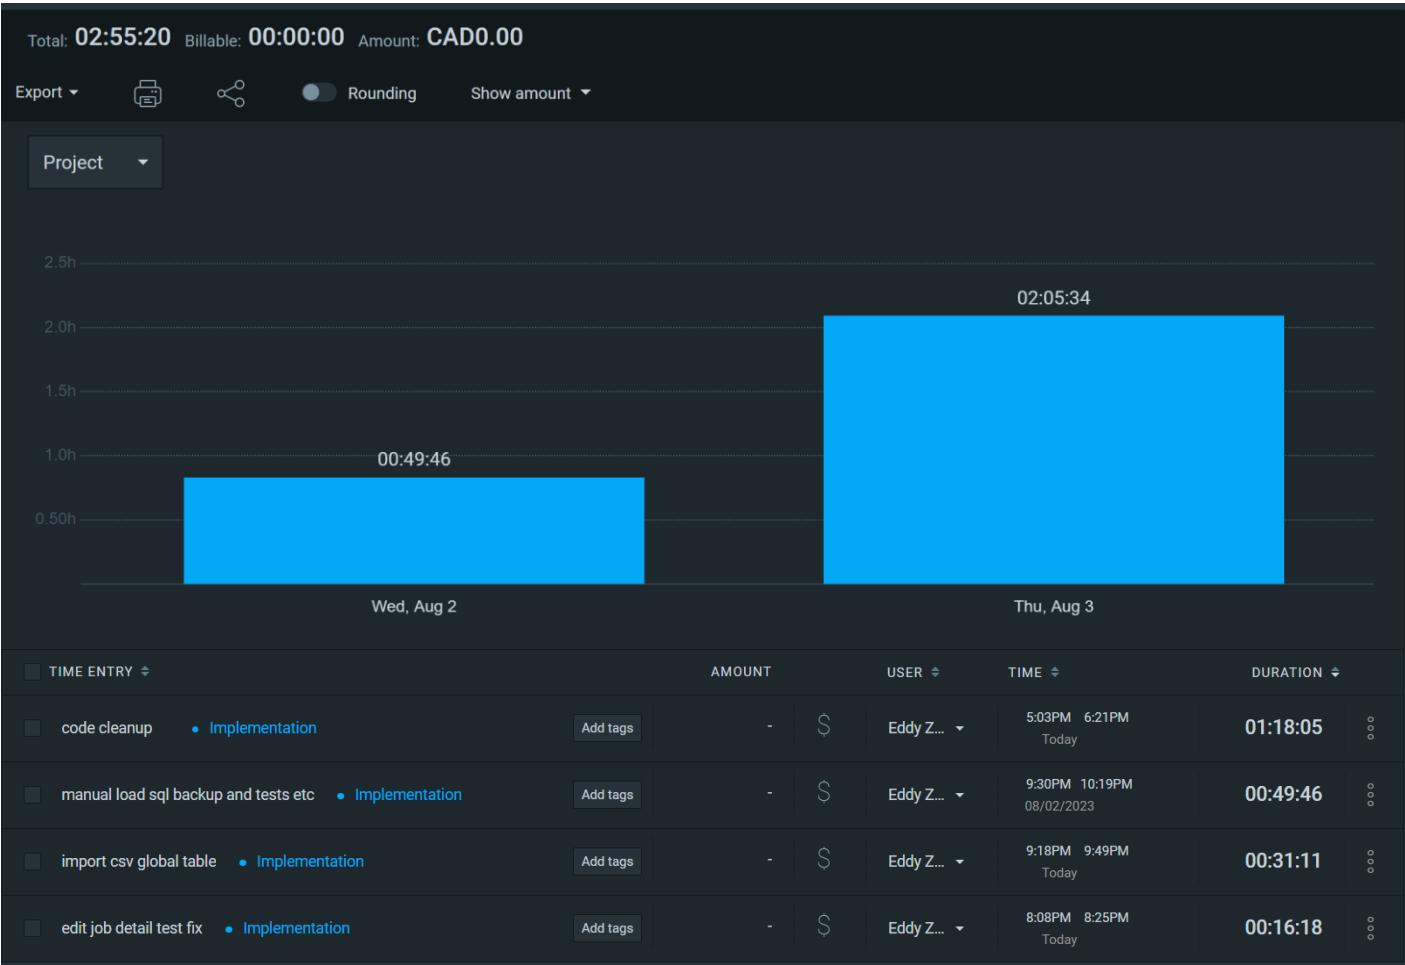

- Did a lot more changes to PR #274 (job details overlay)
 - refactored getting the graph data out of the file that generated the overlay, allowing the graph to be called on its own (i.e. after an edit to the job, can refresh the graph)
 - Changed the start and end ranges to always include the start and end date of a job as well as today (was surprisingly complicated)
 - Added some client-side validation. It still doesn't look super pretty but it works
 - Some fixes for firefox/safari not liking the month input type
- Reviewed all of PR #274 (we had a few people working on it) and dealt with a biggish merge conflict
- Personal logs
- Create Report

Wed Aug 2nd

overall time spent: 9h

- Client meeting
 - They shown us that the computer that would be running the server is within their server room, so it should be secure. This means we don't need to worry about the hyper-V stuff
 - They also mentioned the computer is connected to wifi, so we'll be able to clone it right off of github
 - We got to see what our website looks like on their big TV and got some minor styling feedback
 - We said it can take as little as 1 hour but at most 2.5 hours, and they said they don't want to go later than 4:30pm (for reference we're starting at 1)
- Discussed the client feedback we got regarding styling the projections
- Reviewed PR #272/273 (gif docs vs image docs) a little and chose that the gif one would be a better
- Reviewed PR #276 (edwin's styling)
- Reviewed PR #284 (more styling stuff), reverted some stuff off of master that should not have been pushed
- Reviewed PR #258 (importcsv), made some bug fixes to it and refactored some things. Still needs a couple things
- added and organised issues
- Started reviewing PR #274 (job details overlay) and started working on improving it
 - made start date and end date months
 - refactored add job's client-side validation and seperated it, allowing it to be used in edit job details
 - added better error checking onto add job and edit job employee
 - made some query optimizations
 - moved job details stuff into their own folder
