Adam

Tues Aug 15th

overall time spent: 11h (predicted)

- merged in some PRs and updated the deployment branch + client fork
- fixed a bug regarding to inactive/in school on job page not always updating (was an asynch issue, had to change change_active())
- wrote an email to client about getting them to sync the new changes
- update personal logs

- A frickload more final documentation

Mon Aug 14th

overall time spent: 7h

- Review PR # 361 (even more tests), PR # 362 (help tab fixes), PR # 359 (client requested changes)
- Made a lot of fixes in client requested changes (fixed edit/save button interfering with other overlays due to using same id, fixed meeting/deficit/surplus for outlooks, more)
- fixed drone again
- more final documentation
- made a cute little about tab on login
- wrote another email to client regarding putting inactive/in school on the job page

Sun Aug 13th

overall time spent: 0.5h

- just discussed a bit regarding final docs

Sat Aug 12th

overall time spent: 4.5h

- updated usecase diagram again
- Made a prioritised list of use cases/features (mostly to act as a list for what needs to be documented first in case we don't have enough time)
- Worked on final documentation (documented a bunch of the global functions, got edit outlook done (use case description, sequence diagram, implementation description))

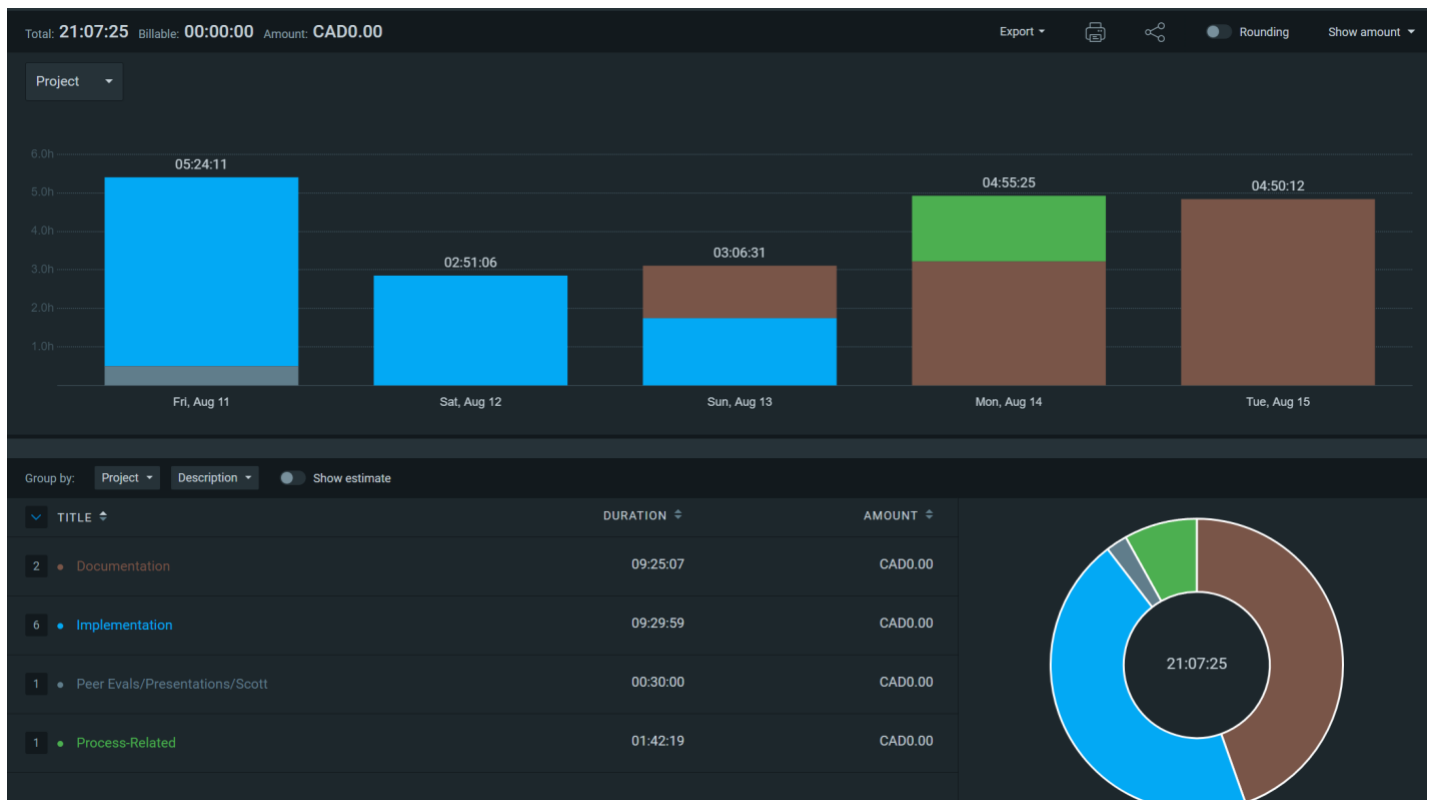

Fri Aug 11th

overall time spent: 8h

- Practice presentation with scott, got a lot of great feedback.
- More work on history page
 - made ranges work
 - Refactored the two job-details to make only one
 - added unarchive job (front end, backend, tests)
 - Worked with edwin to get pages working (jobs per page, prev/next page) - done since showing all jobs per page was very laggy
- Added some new issues
- Wrote email to client regarding how hard the changes they requested will be to make

- Reviewed PR #355 (batch assign fixes), PR #346 (projector number indicator), PR #356 (fix tests + new tests)
- Added some cool search highlighting on all searches by using a regex to add tags around search term
- Peer Evals
