

Horizon Scheduling Board

Report Wed Aug 9th (reflect work Aug 4 – 8)

Completed Tasks

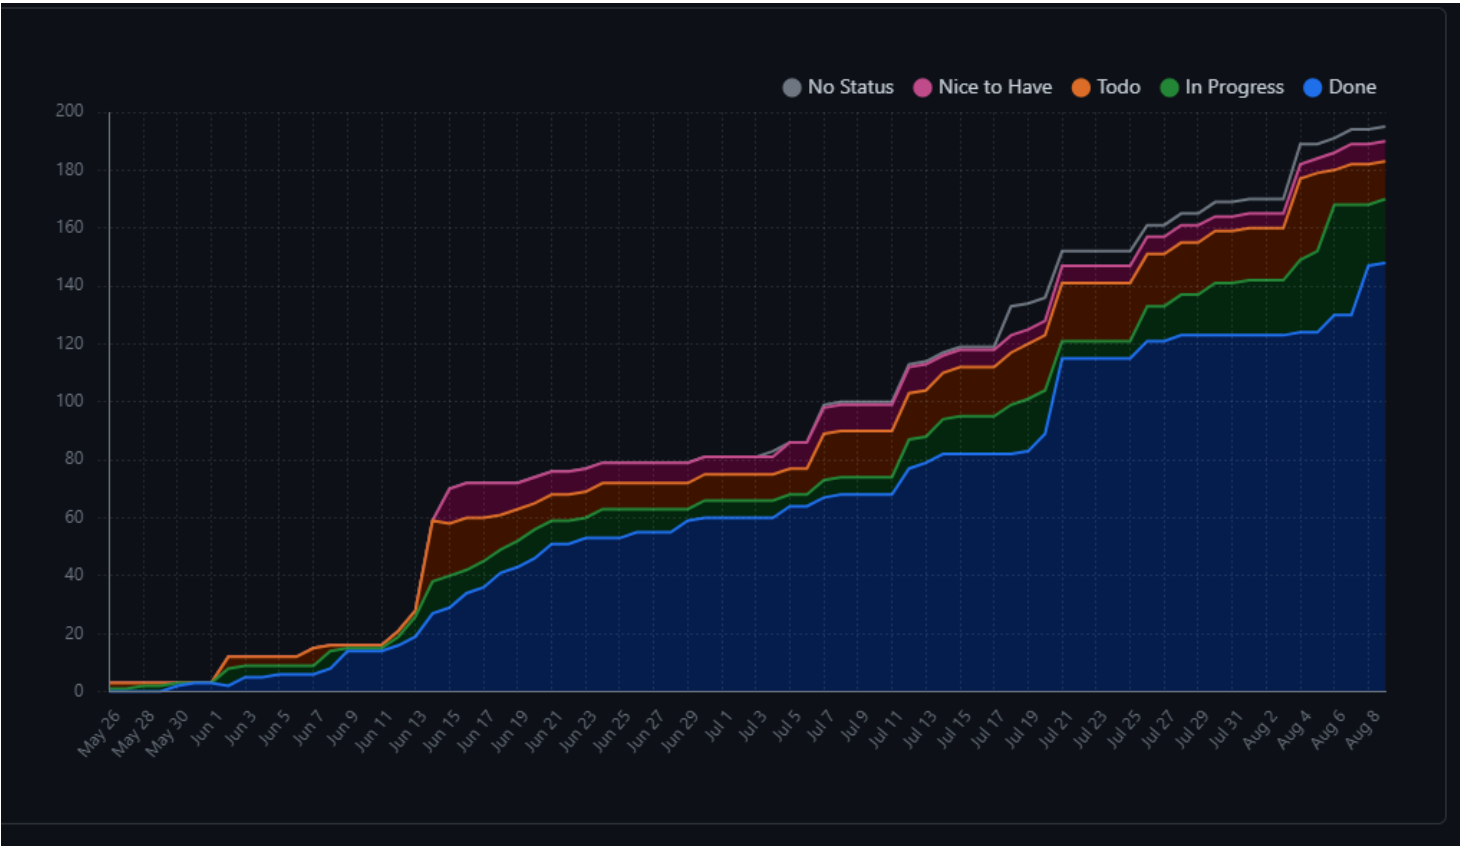

192	✓ Add alternate way to duplicate employees #333	 Zecr	Done
137	✓ Make addjob ajax instead of page refresh and have the new job open up on success #298	 Zecr	Done
138	✓ Cancel on change admin pass doesn't work #310	 Zecr	Done
139	✓ reset user password confirmation message #299	 Zecr	Done
140	✓ Reset manager account update list after add manager #309	 Zecr	Done
141	✓ Background upload doesn't enable background but shows it when upload #311	 Zecr	Done
142	✓ Fix mass remove set assignment end date #306	 Zecr	Done
143	✓ Fix pin employee delete and dragback unarchive #307	 Zecr	Done
144	✓ Make copy password more obvious - Set to generate overlay #316	 Zecr	Done
145	✓ Remove email text from login screen username input field #318	 Zecr	Done
146	✓ Batch assign stop click employee #320	 Zecr	Done
147	✓ Batch assign disable button when no employees #315	 Zecr	Done
148	✓ Stop JS injection edit employee #308	 Zecr	Done
149	✓ Add tool tip to archive/delete buttons #313	 Zecr	Done
150	✓ Recent password change prompt #262	 Zecr	Done
4	🟢 Employee list doesn't show uploaded images #317	 JordoRob	Done
5	🟢 Change employee status on employee details page #301	 JordoRob	Done
193	🟢 Required Astrix #343	 JordoRob	Done

Not sure if I'm missing anything, github projects is a load of poop that doesn't auto sort the done tasks list in any manner so I have to manually scan through the list to find the stuff we did.

In Progress

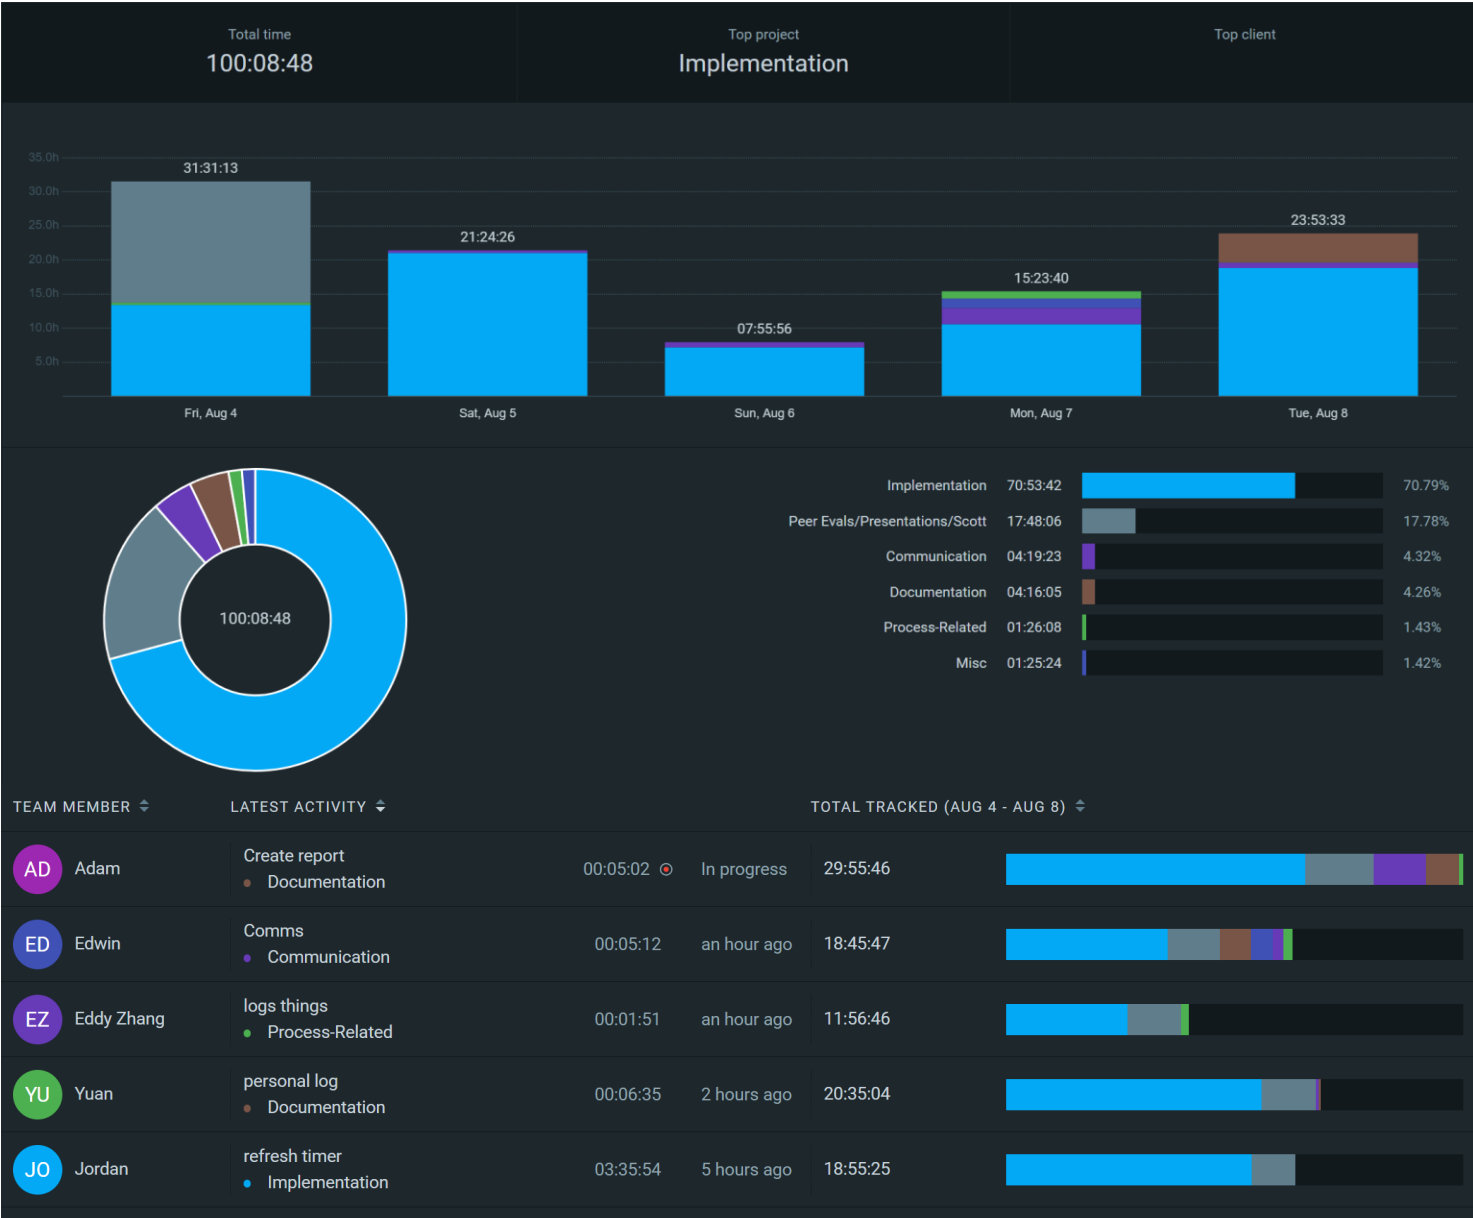

193	History Screen Pages #342	Zecr	In Progress
194	History Screen Ranges #341	AdamFipke	In Progress
195	History Screen - Crazy Query #261	AdamFipke	In Progress
196	History Screen Job List #220	AdamFipke	In Progress
197	History Screen Graphs #321	AdamFipke	In Progress
198	History Screen Unarchive Jobs #322	AdamFipke	In Progress
199	Change static dropdown options to dynamically pull from Global D... #148	Zecr	In Progress
200	Investigate and fix loading autosaved backups #302	AdamFipke and trtin1	In Progress
201	Help + Documentation screens #296	yuan-yz-z	In Progress
202	Refresh countdown into Icon instead of text #329	JordoRob and Zecr	In Progress
203	Change username #338	Zecr	In Progress

Burnup

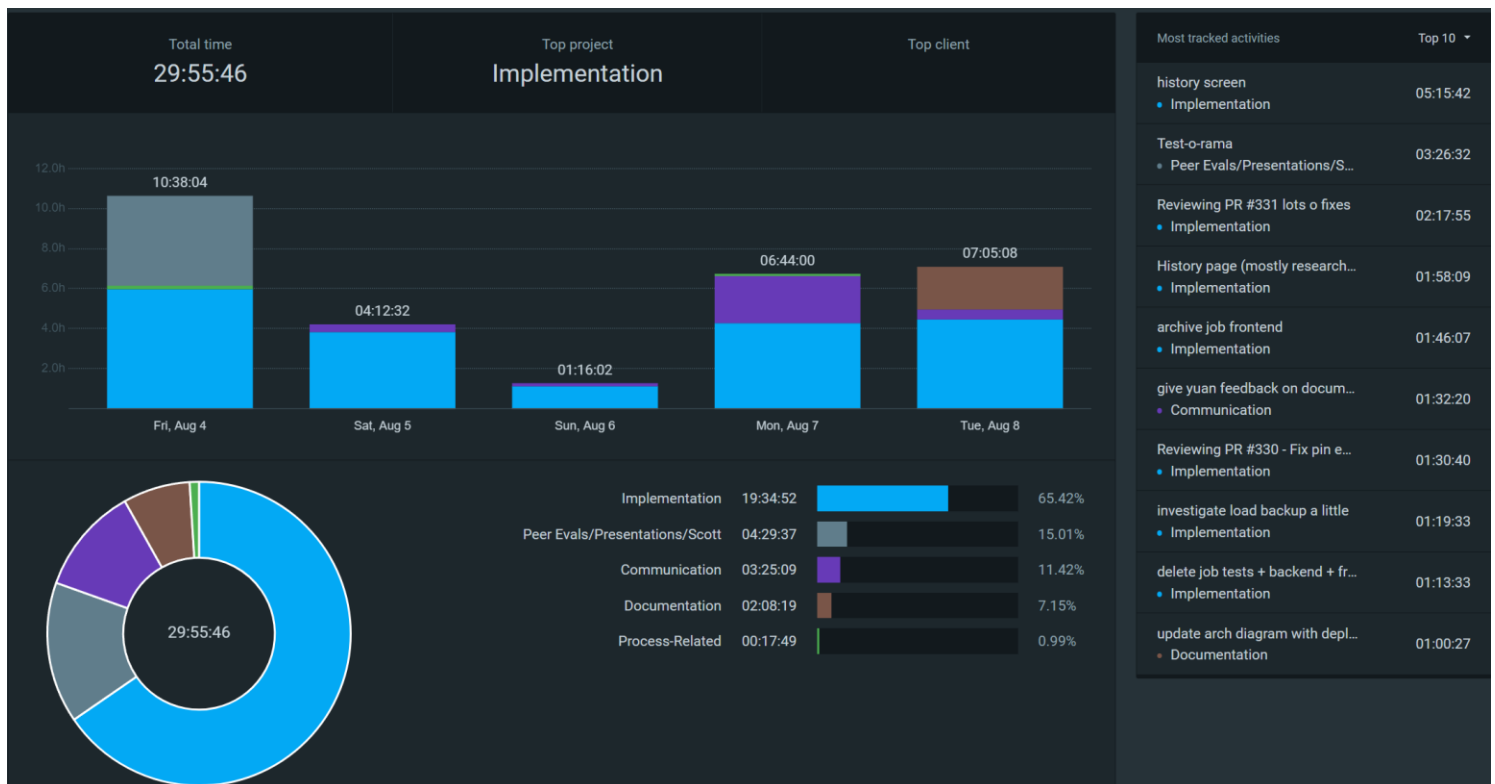

Ayy it looks like it moved again!

Time Summary

Adam

Overall let's say 20 cards done for me

Tues Aug 8th

overall time spent: 7h

- Updated the architecture diagram to add on some deployment details and to make it more accurate overall (in final docs)
- Discussed getting continues deployment set up and the new arch diagram
- Started Reviewing PR #355 - backup fix
- Reviewed PR #336 - Duplicate employee
- Got more done on the history screen
 - Refactored get graph data function so that they work with a start range and an end range
 - Some styling changes to make the archived jobs a different colour and the graphs to make them fit a little better
 - Made the "actual" and "outlook" legend only show on the top job, with the x-axis labels only showing on the bottom job (it looks pretty slick now i'd say haha)
 - Added an "All Jobs?" toggler to toggle showing the graphs for all jobs vs only archived jobs
- Updated personal logs
- Made Report

Mon Aug 7th

overall time spent: 7h

- Reviewed PR #331 (lots o fixes). It refactored a major function (closeOverlay()) to prevent it from refreshing the page multiple times, which required some effort to adjust so it would not break everything (easiest solution was to add a global variable flag on only pages where we don't want to do the refresh on closing the last overlay (admin functions))
- Gave yuan some feedback on the documentation/help page branch
- Made more progress with developing history page (was mostly fumbling around with javascript being a pain in the ass lol, though it should be smoother sailing from here on out)
- discussed the newly merged branches plus priorities moving forward

Sat Aug 5th

overall time spent: 5.5h

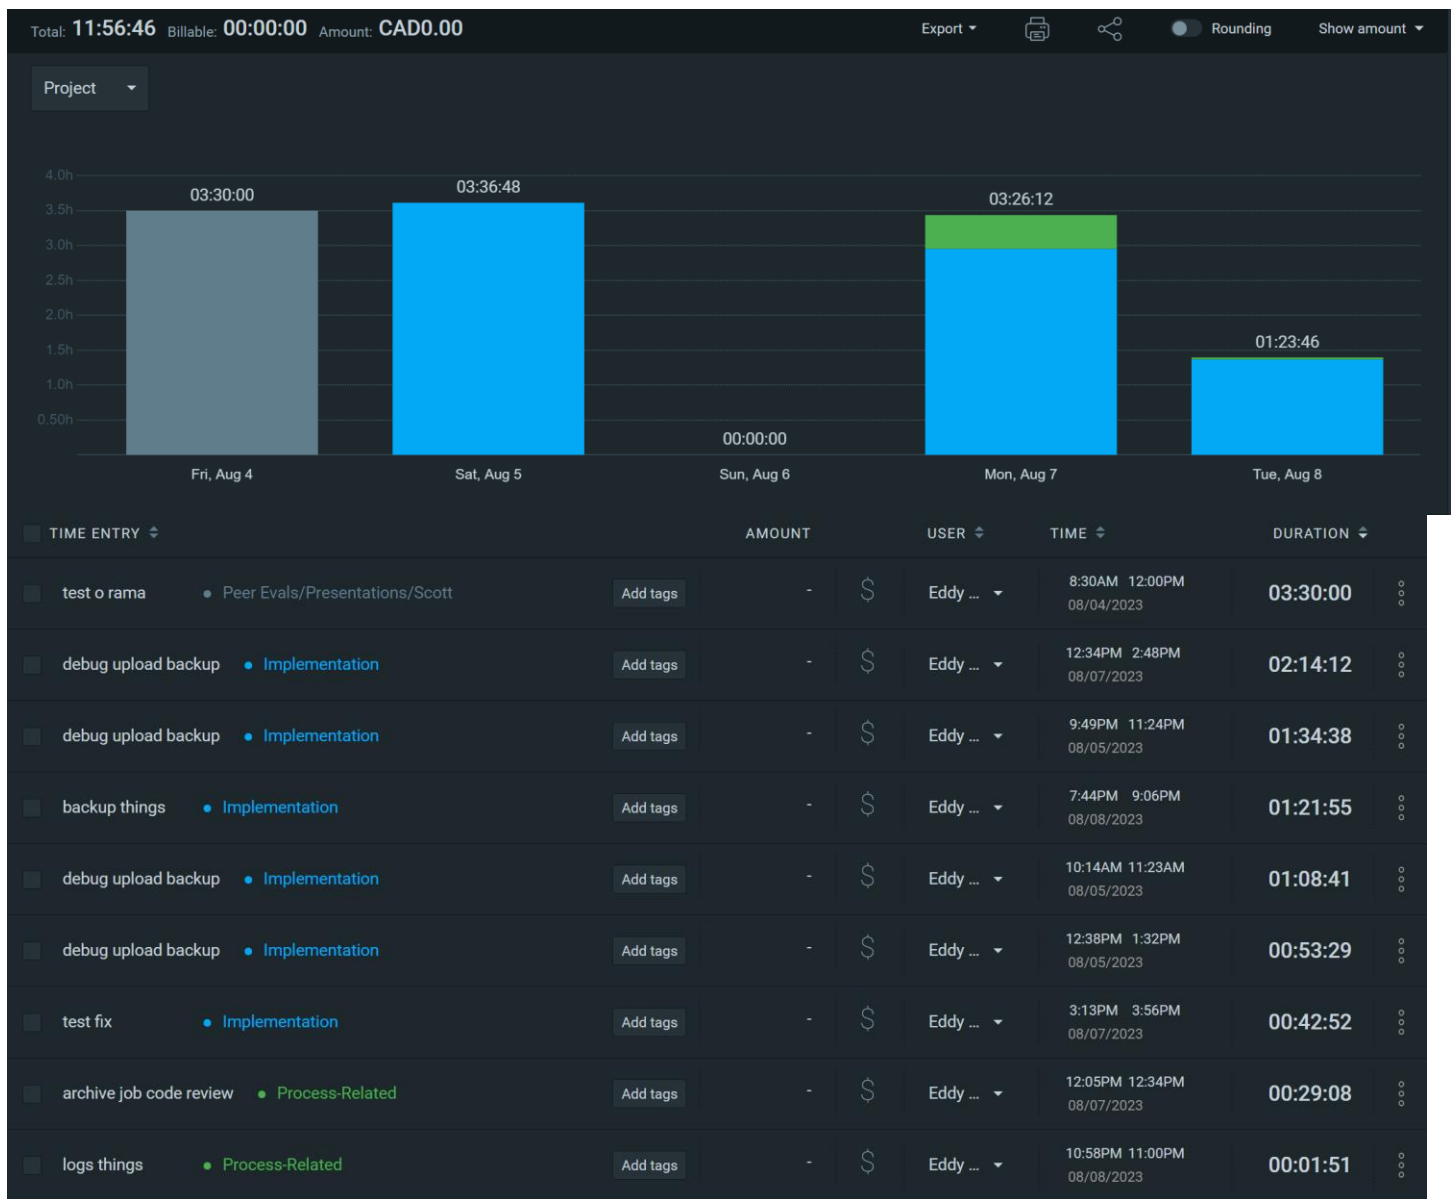

- Discussed some ideas on how history page will look and its features
- Reviewed PR # 325 (required field astrix), PR #326 (Employee Edit Status), PR #327 (Fix mass remove ending assignments), PR #328 (stop XSS injection), and PR #330 (Fix pin employee and batch assign weirdness)
- Started to investigate load backup a little. Turns out pdo doesn't like the START DELIMITER statements that the mysqldumps have been creating around the triggers on the new backups. Eddy might go with doing php exec() instead
- Made a rough guide on how the description of implementation should look like

Fri Aug 4th

overall time spent: 10.5h

- Updated some more stuff for test o rama
- Did test o rama! Got to try out a handful of other people's projects and we got a lot of great feedback which was awesome! Turns out our loadbackup functionality wasn't working either, which wasn't ideal but oh so much better to find out now than later haha
- Made some new issues from the test-o-rama (edwin also made a bunch)
- Made archive job (tests + backend + frontend)
- Made delete job (tests + backend + frontend)
- Got started on the history page, mostly tried to research if there were more efficient ways to get the data into the graphs
- Peer Evals

Eddy

Fri, Aug 4 - 3.5 hr

- test O-Rama

Sat, Aug 5 - 3.5 hr

- debug upload backup
- nothing working due to `file_get_content()` not handling some delimiter things

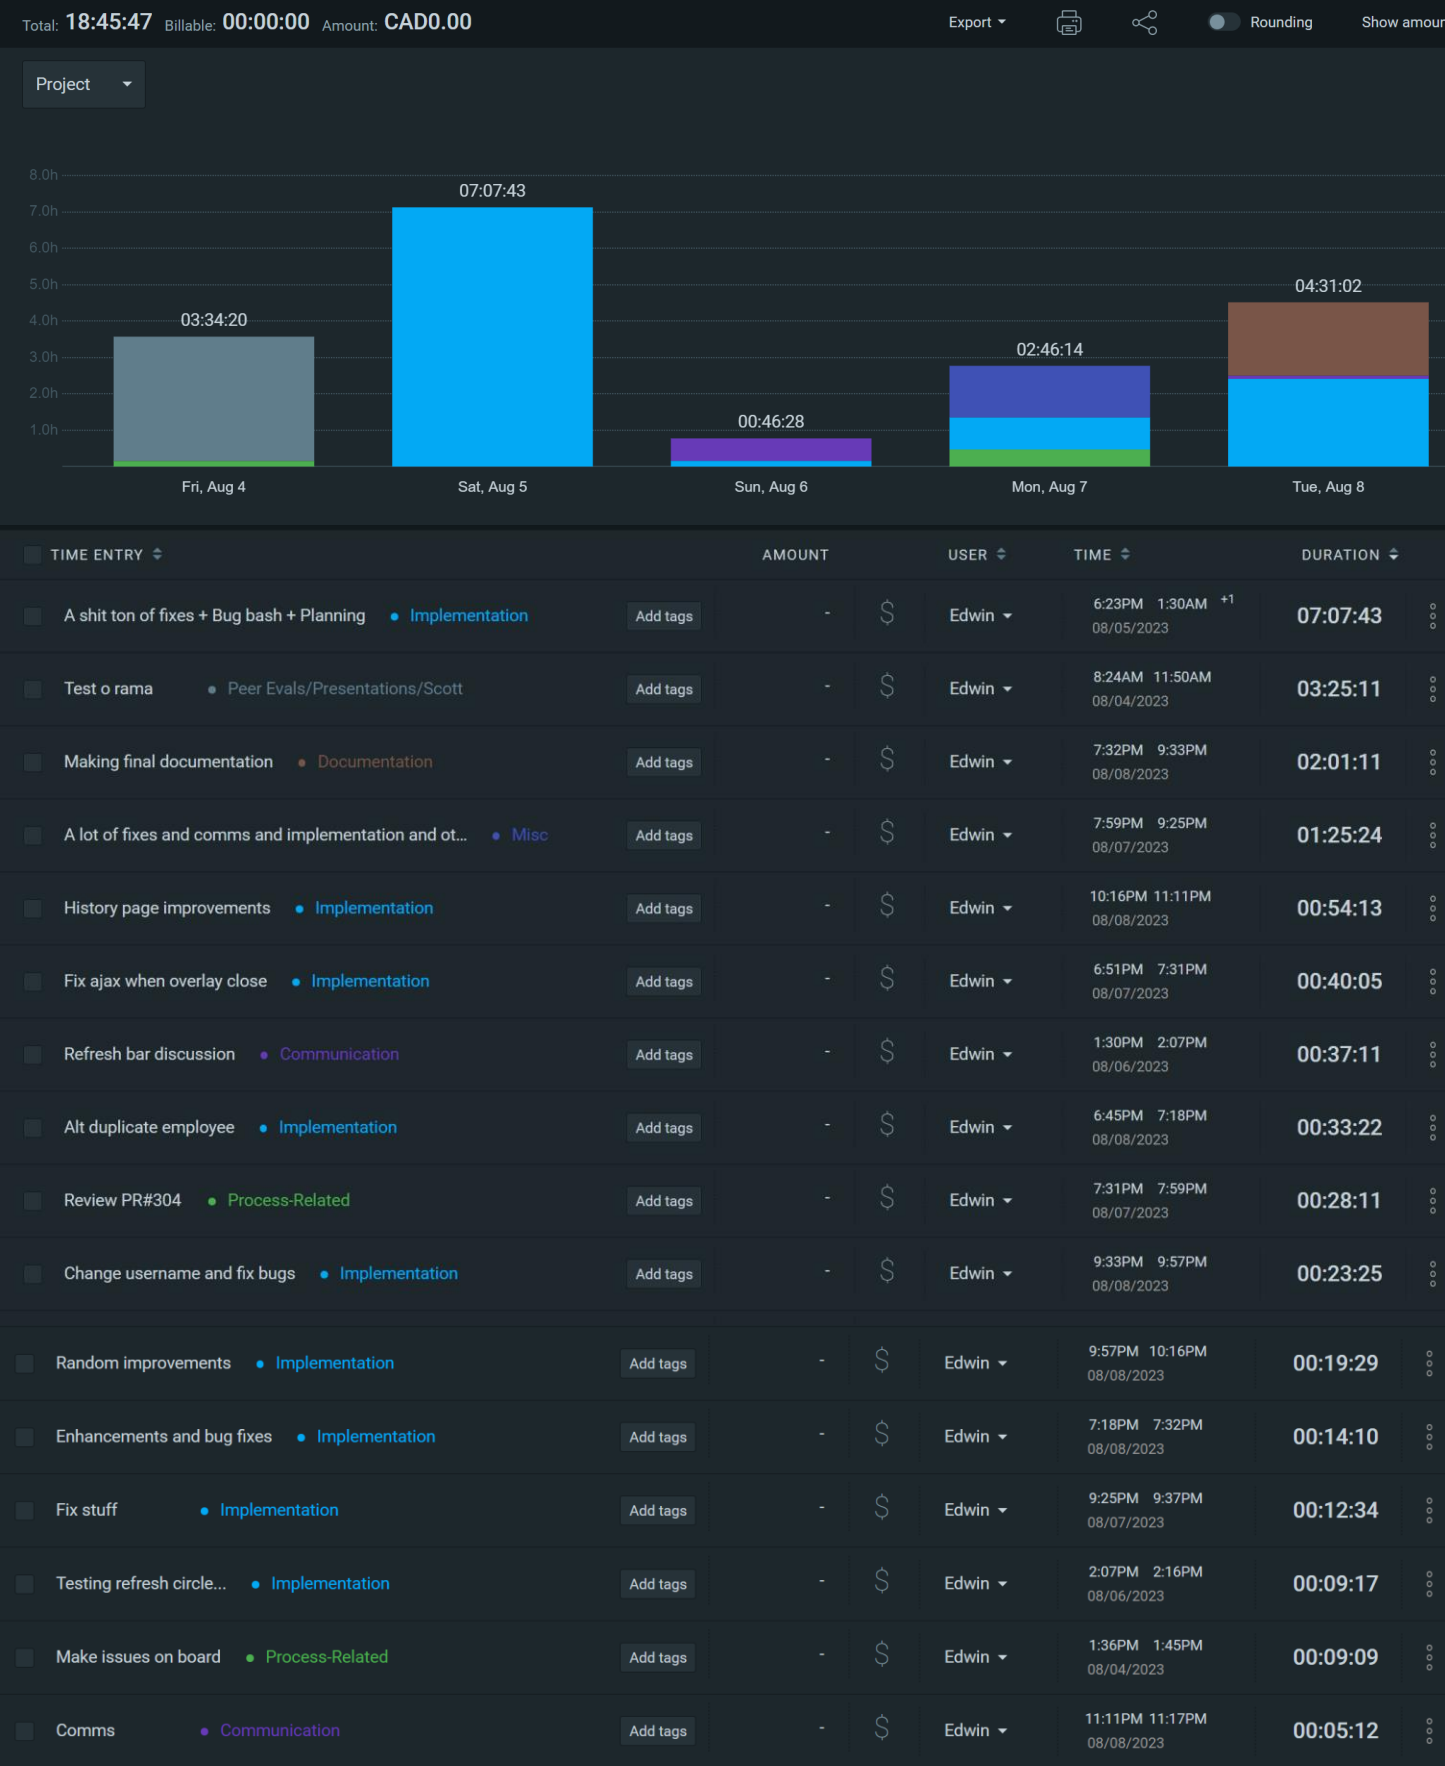

Mon, Aug 7 - 3.5 hr

- attempt to fix `uploadBackupTest`, didn't work due to terminal dependency stuff
- archive job code review
- debugged backup stuff

Tue, Aug 8 - 1.5 hr

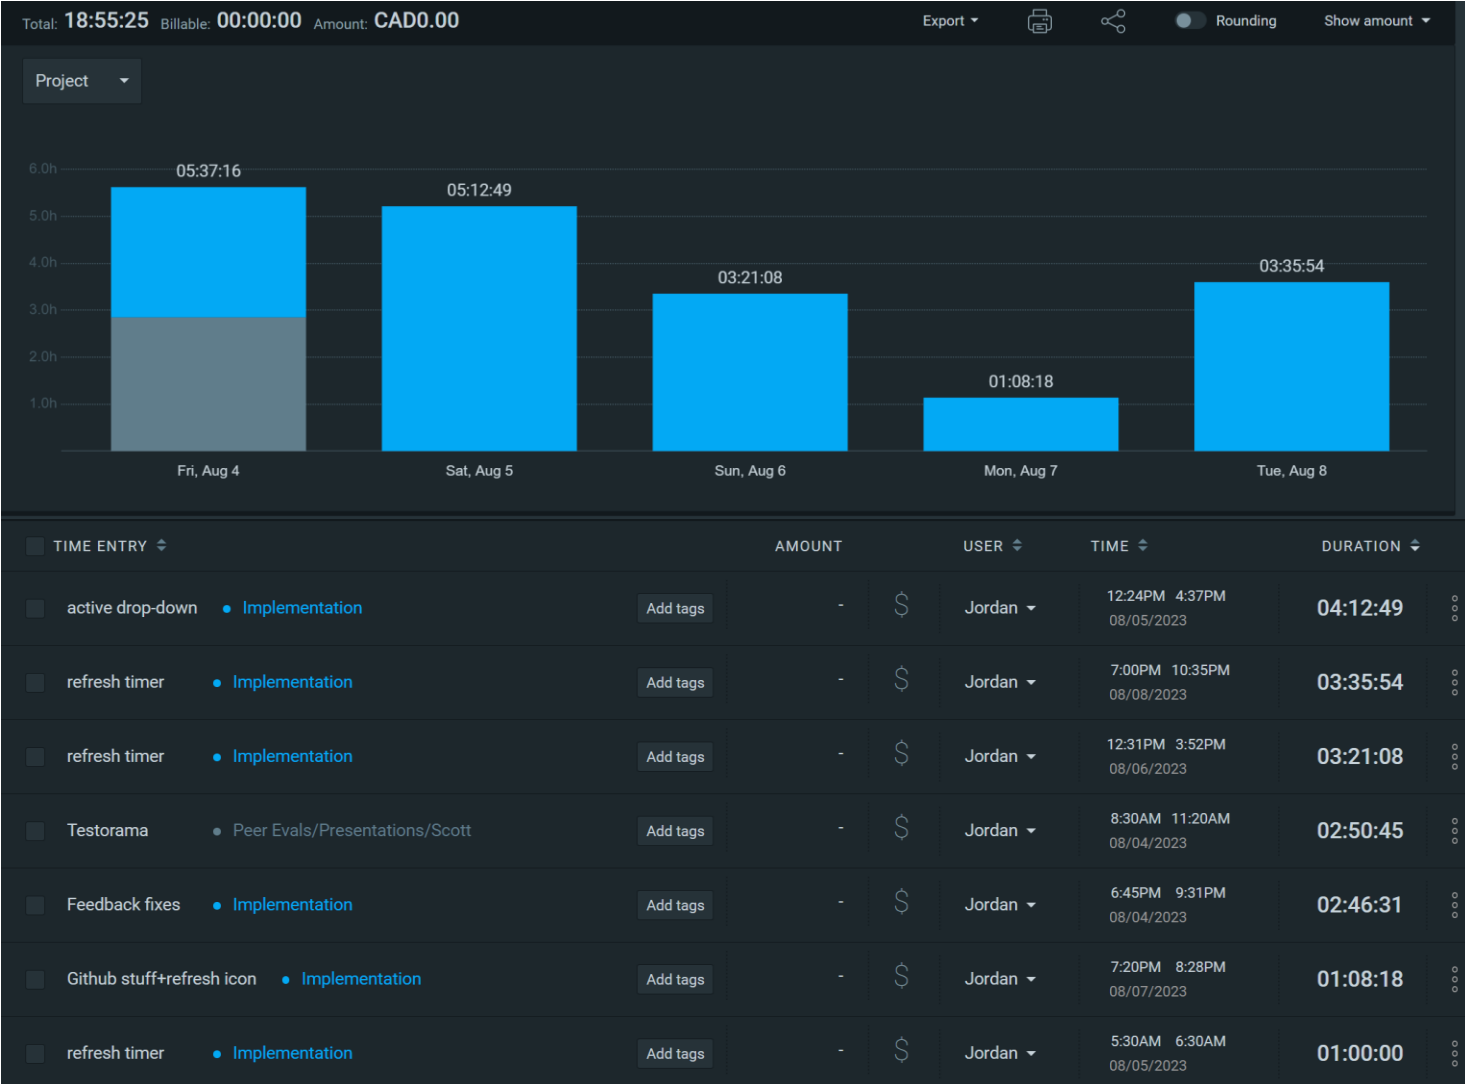

- Edit final doc
- backup error message things

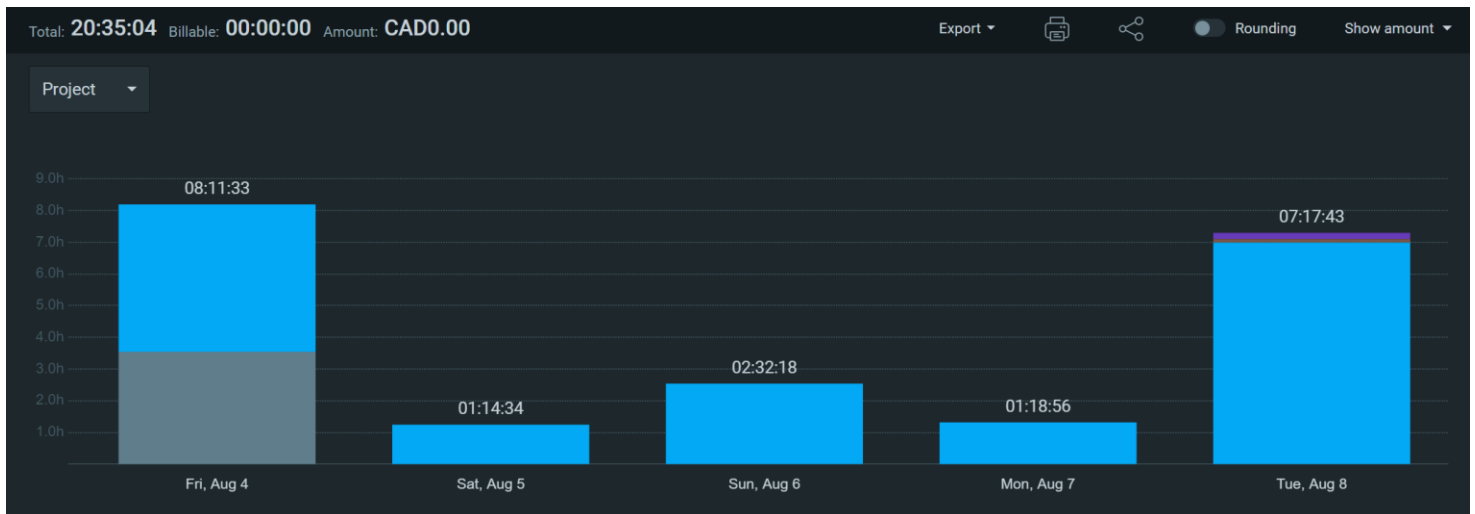

Edwin

Test o rama + Issue making	2023-08-04	214	3.566666667
Crap ton of fixes + Bug bash + Planning	2023-08-05	428	7.133333333
Refresh bar discussion	2023-08-06	46	0.766666667
Lot's o fixes again + Process review	2023-08-07	166	2.766666667
Alt duplicate emp	2023-08-08	33	0.55
Enhancements and fixes	2023-08-08	57	0.95
Final documentation	2023-08-08	121	2.016666667
