Thurs June 29th

overall time spent: 3.5h
- Caught myself up on the status of the project and discussed task distribution and DB changes a little
- Reviewed PR #126, #128
- Started work on the front-end framework for the add-job overlay (issue #100). Also figured out bootstrap can still be used with the project

Wed June 28th

overall time spent: 3.5h
- Got CI/CD working with drone! Now all tests will auto-run on PR and commit to PR. Took a lot of trial and error as there was poor online documentation for it
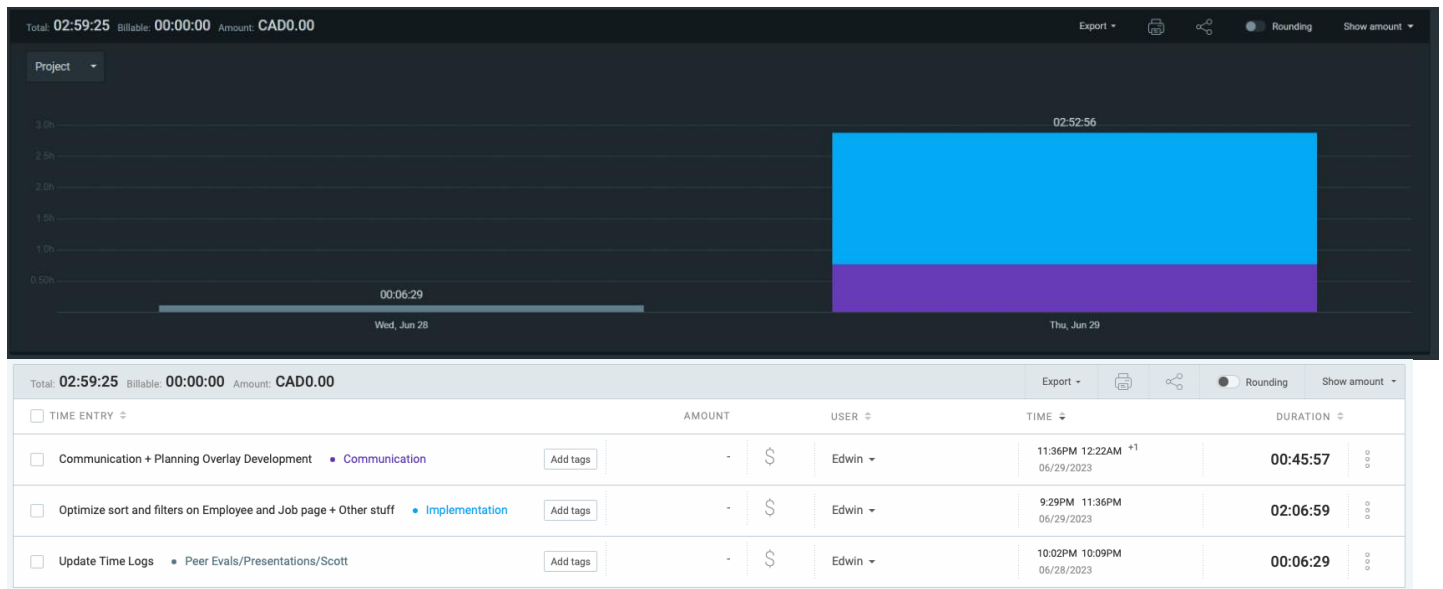

Eddy
